Puducherry Pollution
Control Committee

About the LiFE Campaign

Environmental degradation and climate change are global phenomena where actions in one part of the world impact ecosystems and populations across the globe. Estimates suggest that if requisite action is not taken against the changing environment, approximately 3 billion people globally could experience chronic water scarcity. The global economy could lose up to 18% of GDP by 2050.

Over the last two decades, several macro measures have been implemented globally to address environmental degradation and climate change, including policy reforms, economic incentives and regulations. Despite their enormous potential, actions required at the level of individuals, communities and institutions have received limited attention.

Changing individual and community behaviour alone can make a significant dent in the environmental and climate crises. According to the United Nations Environment Programme (UNEP), if one billion people out of the global population of eight billion adopt environment-friendly behaviours in their daily lives, global carbon emissions could drop by approximately 20 per cent.

In this context, the concept of ‘Lifestyle for the Environment (LiFE)’ was introduced by Prime Minister Narendra Modi at COP26 in Glasgow on 1st November 2021, calling upon the global community of individuals and institutions to drive LiFE as an international mass movement towards “mindful and deliberate utilisation, instead of mindless and destructive consumption” to protect and preserve the environment. LiFE puts individual and collective duty on everyone to live a life that is in tune with Earth and does not harm it. Those who practice such a lifestyle are recognised as Pro Planet People under LiFE.

Changing our lifestyle, however, is not easy. Our habits are deeply ingrained in our daily lives and are continually reinforced through several elements of our environment. Translating our intention to do good for the environment is not always easy to translate into action. However, it is not impossible. By taking one action at a time and making one change daily, we can change our lifestyle and inculcate long-term environment-friendly habits.

Source: <https://www.mygov.in/life/>

Be a part of LiFE Mission, change our Life style to an ecofriendly one

The word LiFE, means “Lifestyle for Environment”. Today, there is a need for all of us to come together and take Lifestyle for Environment (LiFE) forward as a campaign. This can become a mass movement towards an environmentally conscious lifestyle.

- Prime Minister Narendra Modi at COP 26

Day 1 – Carry a non-plastic water bottle while stepping out of home.

Day 2 – Use cloth bags for shopping groceries instead of plastic bags.

Day 3 – Use stairs instead of an elevator, if possible.

Day 4 – Practice segregation of dry and wet waste at homes.

Day 5 – Close the tap while brushing, bathing, washing utensils, doing laundry etc.

Day 6 – Turn off the lights, ACs, heaters and home appliances when not in use. (It can save energy).

Day 7 – Turn off the vehicle engines while waiting at signals. (30 minutes of idling at traffic signals wastes nearly 1 liter of fuel).

Day 8 – Don't snip off & throw corners of Milk, oil and any other grocery packets, instead cut the corner vertically, not separating the small piece (Avoid small / microplastic from mixing into other waste).

Day 9 – Use Biodegradable utensils (Across the country, street and public food joints should serve food in plant based biodegradable utensils and tea in clay pots).

Day 10 – Alternatives to energy intensive practices are common to Indians (Sun-drying of clothes and hand washing dishes reduces the need of energy-intensive driers and dish-washer, respectively).

Day 11 – Use bicycles whenever possible (Dutch citizens have incorporated sustainable transportation into their daily routines. The Netherlands has more bicycles per capita than any other country in the world).

Day 12 – Use public transport wherever possible.

Day 13 – Feed unused & uncooked vegetables or leftovers to cattle/pets/street animals, to reduce food waste.

-  Day 14 – Pre soak heavily soiled pots and pans before washing them.
-  Day 15 – Defrost fridge or freezer regularly.
-  Day 16 - Service or maintain your bike or car regularly to avoid air pollution.
-  Day 17 - Create kitchen gardens / terrace gardens at homes / schools / offices.
-  Day 18 – Reuse water drained out from AC/RO for cleaning utensils, watering plants, etc...
-  Day 19 – Reduce paper usage (use both sides of the paper while printing), go for E-office setup / online mode.
-  Day 20 – Dispose gadgets in nearest E-recycling units.
-  Day 21 – Participate in and mobilize participation for clean-up drives of cities and water bodies.
-  Day 22 – Initiate and / or join green clubs in your residential area / school / office.
-  Day 23 – For decoration or gift-wrapping use eco-friendly product instead of plastic.
-  Day 24 – Use fountain pen rather than one time use ball point pen.
-  Day 25 – Compost food and yard waste.
-  Day 26 – Soak lentils and pulses for energy-efficient cooking.
-  Day 27 – Donate clothes and other goods which are good to use, but not in use.
-  Day 28 – Use Ecofriendly cleaning products.
-  Day 29 – Shop for products that are locally produced. This reduces energy used for transportation, refrigeration, etc.
-  Day 30 – Recycle and reuse as much as possible.

SMALL CHANGES BIG IMPACT

Don't Snip off & Throw corners of Milk sachets.

Be Very mindful of not separating out any small piece.
